Application for Industrial Training / Internship Placement

Dear Hiring Manager,

I am writing to apply for an industrial training or internship placement. I am currently a second-year Mechatronics Engineering student studying for a BEng + MEng (Hons) at the University of Nottingham Malaysia, with an expected graduation in 2028. As part of my degree requirements, I am required to complete a 12-week internship during the summer period from early June to September.

I am seeking an opportunity to gain practical engineering experience within an industrial environment, where I can apply my academic knowledge while developing professional and technical skills. I am particularly interested in roles related to mechatronics, automation, electrical, mechanical and embedded systems, as these align closely with my studies and long-term career goals.

Through my coursework and projects, I have developed relevant technical skills and hands-on experience in integrating mechanical, electrical, and software systems. I have worked on an industrial conveyor test rig and robot arm pick-and-place system, where I implemented an Arduino Mega as a real-time controller to interface industrial equipment, produced wiring schematics and I/O maps, and supported system commissioning and testing. I have also contributed to mechanical design-and-make projects, including a centrifugal clutch and pneumatic mechanisms, producing engineering drawings, bills of materials, and supporting fabrication and assembly.

In addition, I have gained experience in robotics and embedded systems through projects such as an Arduino-based line-following robot incorporating sensor integration, motor control, and wireless communication. These projects have strengthened my problem-solving ability, teamwork, and attention to detail. I am proficient in SolidWorks, MATLAB, Python, and C programming, and I am motivated to continue developing these skills in a professional engineering setting.

I would also like to mention that I am comfortable and willing to undertake this internship in India, Malaysia and Saudi Arabia (All Valid visa) should the opportunity be available.

I have enclosed my resume for your consideration and would welcome the opportunity to discuss my application further. Thank you for your time and consideration, and I look forward to hearing from you.

Yours faithfully,

Shahid Syed Ali
